

1. CAT Walk in brief

The CAT Walk offers an opportunity for the public to be involved in the protection of tigers (including other wildlife) and their habitat at the Sungai Yu Tiger Corridor in Merapoh, Pahang. The Corridor, which is the last remaining natural connection between the Titiwangsa Main Range and the Taman Negara in Peninsular Malaysia, is an area known for poaching, forest encroachment, and illegal mining to take place. CAT Walk volunteers report the finding of such crimes to the MYCAT Wildlife Crime Hotline (019-356 4194) who relays the information to authorities for enforcement action.

2. What to expect on a CAT Walk?

While trekking and enjoying the great outdoors, CAT Walk volunteers will look for signs of poaching (i.e. snares, traps) and encroachment (i.e. campsite, illegal logging, and mining) as well as animal signs (pugmarks, claw marks on trees, etc.). Some routes are also good for bird watching. Do expect to get: mosquito/insect/leech bites; wet in rain/river/sweat; or sunburnt (a hat and/or sunblock would come in handy).

Trek conditions: A CAT Walk route might be one or a combination of these situations: wet/muddy path, flat or hilly trail, gradual or steep climb/descent, walking along/across railway tracks, walking on animal trails, walking along/across rivers with waist-deep water. The trails are not on platform boardwalks.

Please take note that smoking or vaping is not allowed in the forest area.
